

COVERMATE III LOCKDOWN STRAP INSTALLATION INSTRUCTIONS

To install the lock down straps, separate the support arms from the coupler bar (the straight bar that goes over the center of your cover) and slide a strap on to each support arm. You will then need to determine where on your spa you want to attach the clip that you will fasten the lock down strap to and attach the clip to your hot tub. Re-attach the support arms to the coupler bar. Each time you close your cover, fasten the lock down strap to the clip on your spa just like you do with the straps on your cover.
