* Schedules will be established at order placement and will be within 16 weeks if parts are available. If parts cannot be obtained, some versions will not be available. Date and availability information will be provided at order placement.

SIEMENS

The Industry's Most Complete Line Of Busway Products

Sentron Busway

Our flagship product rated 225A - 5000A. Sentron Busway is so versatile it's used throughout the industrial and commercial construction industry worldwide. Sentron Busway is the only busway to be certified to design standards worldwide (UL, NEMA, IEC, CSA, VDE, BS,) Bulletin BUSA-0592C

XL-U Busway

XL-U Busway set the industry standard for robust durability and performance with welding applications. XL-U Busway is available in ratings from 225A - 6500A. Due to the reputation XL-U Busway has acquired through the years, it is the product of choice throughout the automotive and industrial markets. Bulletin BUSA-5321C

ITD (Trol-E-Duct) Busway

Trol-E-Duct Busway, available in 100A and 225A ratings, provides portable power, feeding power to tools, cranes hoists and a variety of moving loads continually and efficiently. Trol-E-Duct Busway utilizes a channel form that creates an internal raceway for trolley type plug-in units to glide effortlessly along with your power applications. Bulletin BUSA-0521D

BD Busway

BD Busway, rated from 225A to 1600A, has consistently proven to be the industry standard for excellence for over 65 years of service. This standardized and versatile product is used in both the industrial and commercial construction market and is maintained as a stock product to service your quick ship requirements. Bulletin BUSA-5331E

XJ-L Busway

XJ-L Busway, rated 100A and 200A, is known for its outstanding performance serving the industries that utilize microprocessor based technology to manage and control their processes, due to XJ-L's ability to provide an isolated grounding system. Bulletin BUSA-0531E

Technology That Serves The Customer

Distributor And Warehouse Availability

Siemens distributors offer a broad range of distribution and control materials and displays that educate customers about features and benefits of Siemens products. BD Busway, is just one of the many products represented.

In addition to our worldwide presence, Siemens distributors offer a world class variety of products that meet almost all customers distribution, automation and control requirements.

Siemens maintains BD Busway stock, through a warehouse system that can deliver your busway needs within 72 hours of order placement. Ask your local Siemens distributor for details on ordering BD Busway on

your next project and experience the advantage BD Busway provides over traditional cable and conduit. BD Busway can be ordered direct by our distributor, onto our warehouse, through our automated order entry system. That means your order is processed on a same day basis, direct onto the warehouse.

BD Busway is also provided on large projects, where Siemens engineers will provide you, the installer, with complete layout drawings and a step by step installation instruction, to make installing BD Busway effortless.

Siemens distributors throughout the United States carry a full line of standard products that can take care of a majority of your projects.

Many of these distributors can also provide same day availability of:

- **Lighting Panelboards**
- **Busway**
- **Busway Plug-In Units**
- **Power Panelboards**
- **Switchboards**
- **Distribution Transformers**
- **Molded Case Circuit Breakers**
- **Enclosed Switches**
- **Control Products**

At Siemens Energy & Automation, Inc.,
our commitment to total quality throughout
our company is the hallmark of our business
and our pledge to our customers and employees.
In recognition of this, we are pleased to
participate in

ISO Certification

A handwritten signature in black ink, reading "Thomas J. Malott". The signature is fluid and cursive, with a long horizontal stroke at the end.

BD Busway

A Matter of Dedication To It's Heritage And It's Future

Siemens BD Busway has been the cornerstone in the Busway business for over 65 years.

Introduced in 1932 by Bulldog Electric, BD Busway has a heritage that boasts of thousands of installations still in operation today— 65 years later!

Ease of installation and reliability are the foundations for BD Busway. Through the years, we have maintained this robust design of busway, and will continue to maintain this same design of BD Busway for the future!

It's strength is it's design, which has not changed from when it was introduced to the market, and that's dependability! 65 years later, you can order additional busway that will be 100% compatible with your original installation.

BD Busway is used in all different types of applications, serving the industrial, commercial construction, institutional and automotive markets.

It's air insulated busbar design provides for a rugged level of performance in all applications and has become the standard specification for many Fortune 500 corporations across the United States.

For 65 years, BD Busway has continued to serve the busway industry well and will continue to serve it well into the future.

Standard items of BD Busway are available through our warehouse system and are shipped from stock, to suit your quick ship needs. Just ask your local distributor about BD Busway availability. BD Busway can also be used on major busway installations, where your application is precision engineered to your requirements and shipped according to your construction schedule.

At Siemens Energy & Automation, Inc., we're proud of our heritage in BD Busway and equally proud to continue to offer you the rock of the busway industry, BD Busway!

PRECISION THINKING

BD Busway “In Stock” Warehouse Program

These BD Busway and Plug-In Unit catalog numbers are available through stock. Your Siemens distributor can order 100% of the below catalog numbers using the Siemens automated order entry system. All warehouse shipments leave our warehouse within 24 hours of ordering.

- ① For higher short circuit ratings add an "H" after the "D" or "P" (ABDH302 or BDPH302) and add 20% to the list price.
 ② Consult local sales office for five foot length.
 ③ Includes busway stub. Total length added to run is 2' for 225A and 400A Aluminum or 225A-600A Copper; 3' for all others. Box is designed to connect to offset bus bar end. When it is to be connected to straight bus bar ends, an adaptor will be furnished upon request.
 ④ Must be factory-assembled to Busway. Complete device includes 10' Busway.
 ⑤ Switchboard stub includes flange to cover cutout in top of indoor switchboard and 6" of bus inside switchboard connecting hardware supplied by switchboard manufacturer.
 ⑥ Two Hangers included free of charge with each Busway Section and Elbow.

Plug Capacity

Each 10 foot standard straight section has ten (five each side) plug-in opening with which to meet your branch circuit power needs. Since they are spaced alternately along two sides of the busway, all may be used simultaneously. System flexibility is built-in since today's molded case circuit breakers and fusible Vacu-Break® plugs are as compatible with yesterday's BD Busway as they will be with tomorrow's.

① Switchboard stub includes flange to cover cutout in top of indoor switchboard and 6" of bus inside switchboard. Connecting hardware supplied by switchboard manufacturer.

BD Switchboard Stubs are used to connect BD Plug-in Busway to switchboards. The switchboards are typically Siemens Sentron Switchboards, but also are adaptable to switchboards produced by manufacturers other than Siemens.

BD Switchboard Stubs are furnished with busbar extensions to facilitate in making a connection to the switchboard busbars.

① Includes busway stub. Total length added to run is 2' for 225A and 400A Aluminum or 225A-600A Copper; 3' for all others. Box is designed to connect to offset bus bar end. When it is to be connected to straight bus bar ends, an adaptor will be furnished upon request.

Consult local sales office for other fittings

End Cable Tap Boxes are used to cable connect incoming service to BD Busway. When mounting busway sections flush against a wall or a flat surface, the busway must be mounted with the offset to the right of the installer. This will permit the end cable tap box to mount flush against the wall. BD Busway end cable tap boxes are provided with robust wire bending space to make pulling cables less labor intensive.

① Must be factory assembled to busway. Complete device includes 10' Busway.

Consult local sales office for other fittings

Center Cable Tap Boxes are used to cable connect incoming service to BD Busway. Center cable tap boxes are a convenient way to feed power at an intermittent point along the busway system to distribute power in two separate directions. BD Busway center cable tap boxes are provided with robust wire bending space to make pulling cable less labor intensive and are built to easily interchange with a standard 10'-0" plug-in straight length.

BD Busway building expansion fittings are required whenever a BD Busway system passes through the building expansion location. BD Busway building expansion fittings are designed to expand or contract by $\pm 2"$.

The BD Busway building expansion fitting is available in a standard 10'-0" length to easily interchange with standard plug-in straight lengths.

^① Two hangers included free of charge with each busway section and elbow.
Rod hanger adaptors (UJ100) must be ordered separately.

Two BD Busway hangers are included with every straight length and elbow section ordered. In some applications, you may require additional hangers to accommodate a particular arrangement of busway or to adapt the busway hanger system to the building configuration. Should additional hangers be required, the elbow catalog numbers are provided to make ordering easy.

BDH 10 Clamp Hanger For 4 1/16" and 6 1/16" Busway

For 8 1/16" and 12 1/16" Busway
use Catalog Number BDH12

Three bolt holes in both ends of Hanger allow half the hanger to be adjusted to fit two BD Busway casing sizes (4 1/16" and 6 1/16"). Hanger rods and brackets are supplied by installer.

Plug-In Units Circuit Breaker Type

BD Circuit Breaker Plug-In Units are available in a variety of sizes up to 800A, 600V. To offer you the maximum flexibility in trip ratings required. Our standard BD plug-in units are available as enclosure only and specific Siemens circuit breakers are available at your local Siemens distributor.

In addition to our standard line of plug-in units, Siemens also offers these following custom design plug-in units for your custom applications. Inquire with your local Siemens distributor when ordering these custom plug-in units.

Capacitor Plug-in Units

Capacitor plug-in units range in size from 5 to 15KVA, 240VAC or 480VAC, 60Hz. These plug-in units offer a convenient means for reducing inductive heating and improving the power factor on plug-in busway systems.

① These are for use on busway with internal ground bus manufactured after March, 1986. For ground kits prior to this date, consult local sales office.

② Not required

Lighting Contactor Plug-in Units

Lighting Contactor plug-in units are rated at 10KVA, furnish single-phase current at reduced voltage (240VAC or 120VAC) for lighting and small motor loads. The AC magnetic contactors are available in two ampere ratings (22A and 45A).

Pipe Spacers

The flanges on plug-in busway plugs are designed to fit 4 1/16" wide busway sections. When plugs are to be attached to larger busway sections, pipe spacers must be used and specified when ordering plugs.

Plug-In Units Fusible Switch Type

BD Fusible Switch Plug-in Units are available in a variety of sizes up to 600A, 600V. This plug-in unit line utilizes the Siemens Vacu-Break line of fusible switches, which are quick-make/quick-break designed switches.

Fuses are not included with the BD Fusible Switch Plug-in Units and must be purchased separately. Inquire about your fuse needs with your local Siemens distributor.

1200	2.07	2.51	2.56	2.52	2.46	2.35	2.24	2.10	1.94	1.76	1.56
1350	2.21	2.67	2.73	2.69	2.62	2.51	2.39	2.24	2.07	1.88	1.66
1600	3.30	3.78	2.85	2.80	2.74	2.61	2.50	2.32	2.16	1.95	1.73

Notes:

1. For plug-in distributed loads, divide voltage drop values by 2.
2. To determine voltage drop line-to-neutral, multiply line-to-line values by .577.
3. Actual voltage drop for different lengths and at loadings less than full rated current can be calculated using the formula:

$$V_d (\text{actual}) = V_d (\text{table}) \times \frac{\text{actual load}}{\text{rated load}} \times \frac{\text{actual length (ft)}}{100 \text{ feet}}$$

4. For 50Hz, multiply reactance (X) by 0.85 and resistance values do not change. For 400Hz, multiply reactance by 3.75 and multiply resistance by 1.4.
Calculate new voltage drop: $V_d = \text{amps load} \times \sqrt{3} (R \cos \phi + X \sin \phi)$ per 100ft., where $\cos \phi = \text{Power Factor}$.

Resistance, Reactance and Impedance Values

Ampere Rating	10 ⁻⁶ Ohms per Foot		Leg Impedance	Line-to-Line Impedance	% Power Factor
	Leg Resistance	Leg Reactance			
Aluminum Conductors

BD Busway

Typical Specifications

1.0 General

- A. Furnish and install a complete low impedance prefabricated busway distribution system as shown on the plans.
- B. Busway shall be ____volts____phase____wire.
- C. The ampere ratings, approximate footage, fitting, plug-in units, etc., are shown on the plans. The electrical contractor shall be responsible for routing the busway to coordinate with the other trades. Final field measurements shall be made by the contractor prior to release of the busway for fabrication.

2.0 Short-Circuit Rating and Tests

- A. The short-circuit rating of the busway shall be (*consulting engineer's calculated required ratings*), RMS symmetrical amperes which is the ultimate anticipated short-circuit current available at the source.
- B. The short-circuit rating of the busway shall be determined according to UL Standard No. 857. This rating must be based upon actual tests at the rated short-circuit current for three (3) cycles.

3.0 Basic Construction

- A. Housing
 - 1. The busway housing shall be formed of two identical halves of cold rolled steel, painted with polyester urethane powder paint to provide protection against corrosion.
 - 2. The busway housing shall be totally enclosed non-ventilated for protection against mechanical damage and dust accumulation.
 - 3. Casing ends and busbars of adjacent sections shall overlap to form a scarf lap joint.
- B. Joint
 - 1. Each bus-bar shall be individually bolted to secure electrical connection.
 - 2. It shall be possible to disconnect any joint connection to allow physical removal of busway length without disturbing adjacent busway lengths.
- C. Bus-bars
 - 1. The bus-bars shall be tin plated at all contact surfaces.
 - 2. The temperature rise at any point in the busway shall not exceed 55°C rise above ambient temperature when operating at rated load current.
 - 3. Busbars shall be air insulated.
 - 4. Block type high impact non-tracking insulators shall be used with the casing to support the bus bars, retard the travel of power surges and increase the strength of the busway against short-circuit forces.
- D. Plug-in Openings
 - 1. On plug-in busway plug-in openings shall be spaced on 24-inch centers along both sides of busway and across the joints.
 - 2. All openings shall be usable simultaneously.
 - 3. Busway shall be installed so that plugs are side mounted to permit practical use of all ten plug-in openings.
 - 4. It shall be possible to inspect the plug-in opening and bus-bars prior to the installation of the plug-in unit.

E. Support of Busway

- 1. Hanger spacing shall be noted on layout drawings and shall not exceed manufacturers recommendations.
- 2. Two hangers shall be provided with each busway section for convenient installation.

F. Underwriter's Laboratory Listing

- 1. All straight lengths, fittings, and plug-in units shall be listed and marked in accordance with UL Standard No. 857.

4.0 Voltage Drop

- A. The voltage drop (input voltage minus output voltage) specified shall be based on the busway operating at full rated current at stabilized operating temperature in 25°C ambient temperature.
- B. The three-phase, line-to-line voltage drop shall not exceed 3.78 volts per hundred feet at 90% power factor concentrated load, which condition may exist during motor starting.

5.0 Plug-in Units

- A. Plug-in units shall be ____circuit breaker type or ____fusible switch type with quick-make/quick-break mechanism.
- B. Plug-in units which cannot be operated directly from the floor shall be equipped with suitable means for hookstick operation.
- C. The interrupting rating of circuit breaker plug-in units shall be [] RMS symmetrical amperes.

6.0 Plug-in Unit Safety Devices

- A. Each plug-in unit shall be mechanically interlocked with the busway housing to prevent installation or removal of plug-in units while the switch is in the ON position.
- B. Plug-in enclosures shall make positive ground connection with the ground bus before the contact fingers make contact with the phase bars.
- C. The plug-in units shall be equipped with internal barriers to prevent accidental contact of fish tape and conductors with live parts on the line side of the protective device during time of wire pulling.
- D. Covers of all plug-in units must have "releasable" type interlocks to prevent the cover from being opened when the switch is in the ON position.

7.0 Quality

- A. All busway products shall be manufactured in a facility which is Quality registered to ISO9001.

8.0 Approved Suppliers

- A. All major components shall be of the same manufacturer as the busway. The busway and plug-in units shall be manufactured by Siemens, . . .

The Siemens Advantage: Reliable Products And Reliable Customer Service

Siemens is committed to providing you with reliable products and reliable customer service.

BD Busway has earned the reputation of being the rock of the busway industry and Siemens also provides you with a level of customer service to match.

Siemens has made major investments in providing our distributors with state of the art automated order entry and pricing programs making ordering BC Busway the easiest in the industry.

What that means is quite simple:

**You'll Know What To Expect
And When To Expect It!**

BD Busway has taken 65 years to build and consistently remind you of the quality that it was designed around. Customer Service support of BD Busway is no exception. In today's aggressively competitive environment, average product quality or customer service can be disastrous. A lack of quality in either the product or service can mean the profit you could have made on a project. Dependability is everything!

Siemens employs a national network of field service engineers and product experts, that are ready to provide state of the art technical assistance and customer service, 24 hours per day, 365 days per year. Whether you have a question while at the job site or reacting to an emergency situation, should the need arise, you'll be able to depend on Siemens to assist you through it, regardless of the time of day or night.

You've got to know what to expect and when to expect it!

Ordering BD Busway Example:

Your Project Specifications:

600A, 3 Phase – 3 Wire
Copper Plug-In Busway

You'll need the following BD Busway B.O.M.:

Quantity	Description	Catalog#
(1)	Busway Stub	FEP306
(1)	Flat Right Elbow	BDP3061
(2)	10'-0" Plug-In Lengths	BDP306
(1)	End Closure	ECP6
(2)	100A Plug-In Units Circuit Breaker Type	BEC3100
(1)	100A Plug-In Unit Fusible Switch Type	BOS14321

Provide your list to your Siemens distributor or let him
identify your required B.O.M. from your layout plans for
a price quote.
