

## US Endovascular .035 Hydrophilic Nitinol Guide Wire

### Product Features

- ◊ Poly-Urethane Nitinol Jacket Incorporated with Tungsten Provides Highly Radiopacity.
- ◊ Nitinol core wire offers great kink resistance and tip shape retention, and guarantees outstanding 1:1 torque control.
- ◊ Soft tapered tip increases distal flexibility, contributes to smooth vessel insertion, and minimizes the risk of trauma.
- ◊ Super Smooth and Stable Hydrosurf™ Coating.
- ◊ The patented hydrophilic coating contributes to excellent navigation, which is shown by the uniform and low friction.
- ◊ Soft and Flexible Tip.
- ◊ The soft tip minimizes the damage to vessel wall to ensure patients' safety.
- ◊ Radial Support.
- ◊ Good radial support guarantees pushability during guide wire insertion.
