

FUEL STORAGE – STATIONARY

TRANSTANK P SERIES

3,124 – 23,165 US GALLONS / 11,834 – 87,690 LITRES

The TransTank P Series is a range of environmentally friendly, stationary bulk fuel containers that offers an efficient solution for heavy-duty, on-demand fuel supply applications.

Offering effortless connectivity and a reduced storage footprint, a TransTank P Series is designed to exceed expectations for fuel farms, temporary power plants and complete fueling stations.

FEATURES

EFFORTLESS CONNECTIVITY

Tanks can be linked together for unlimited storage capacity—perfect for fuel farms and power projects.

ENVIRONMENTALLY FRIENDLY

The double-walled design eliminates the need for secondary berms or basins.

DESIGNED AROUND MOBILITY

The TransTank P Series is built to ISO container dimensions and features forklift pockets, allowing the tank to be easily shipped when empty.

ACCESSIBLE

Access manway on the top of the tank allow for access to the inner tank for easy routine maintenance and inspection.

STACKABLE

ISO container dimensions allows tanks to be stacked when empty to reduce storage space required.

SECURE

The lockable equipment cabinet secures all ports and fittings as well as captures all spills and drips.

BUILT-IN LADDER

Built-in ladder allows for easy access to the top of the tank.

APPLICATIONS

COMPLETE FUELING STATION

For fleet refueling or the sale of fuel, TransTank P Series tanks can be fitted to become complete fuel dispensing and management systems.

FUEL FARMS

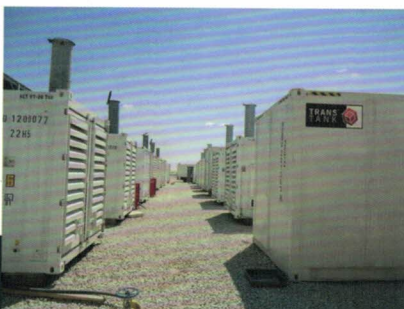

With their modular design, the TransTank P Series tanks can be linked together easily to provide unlimited storage capacity.

BULK FUEL SUPPLY

The TransTank P Series offers an efficient solution for large, on-demand fuel supply needs for construction equipment, generators, etc.

TEMPORARY POWER PLANTS

The TransTank P Series is well-suited for the continuous operation of large generators and international power projects.

FUEL STORAGE – STATIONARY **TRANSTANK TTS SERIES**

The TransTank TTS Series is a range of double-walled, 110% contained fuel containers that provide a continuous fuel supply for generators and other equipment. The TransTank TTS Series is designed to exceed expectations on fuel farms, long-term power systems and disaster relief applications.
