

# ProSolve

D-Limonene Based Solvent

**Spotter #4**

Scan for more product info.

## Why Use?

ProSolve is a new generation biodegradable D-Limonene based solvent spot remover. ProSolve is specifically designed for the removal of oil and solvent based stains such as paint, oil, grease, ink, lipstick, adhesive, gum etc. ProSolve is a synergized combination of D-Limonene solvent and a surfactant blend which combine to penetrate, remove, and suspend all types of spots and stains in carpet or other surfaces. The unique combination of emulsifiable solvents in ProSolve, make it soluble in water and consequently it is easier to use than straight solvent type products.

## Directions:

- 1** Adjust the nozzle to a mist and spray sparingly over the problem area. Do not oversaturate the carpet.
- 2** Agitate the problem area with a hand brush or CRB machine. Blot dry with a micro-fiber towel. Gum - Spray directly onto the gum and allow to react for 30-60 seconds; then scrape with the SCI gum tool until all residue is removed.
- 3** If the stain does not release, consult the SCI Spotter Guide for additional instructions by scanning the QR code above.

\*Gloves are recommended while handling this product.

## Technical Information:

|                              |           |
|------------------------------|-----------|
| Method                       | Pre-Spray |
| Appearance/Color             | Amber     |
| Dilution (oz./Gal.)          | RTU       |
| Pre-Spray Dilution (oz./Gal) | RTU       |
| Rinse Required               | Yes       |
