Tile & Grout System

1

2

Why Use?

The SCI Tile & Grout System is designed for simplicity and ease of use. To ensure tile and grout are properly cleaned, start with Tile Pro Alkali to prepare the surface and break down grease, heavy soiling, and buildup. Then follow with Tile Pro Acid to target the acidic end of the pH scale, effectively removing deep-seated dirt, stains, and mineral deposits from tile and grout. It's as simple as that!

About Each Chemical:

1: Tile Pro Alkali

High pH tile & grout cleaner, highly concentrated degreaser detergent, fast acting, removes carbonized deposits, cuts through heavy grease & soiling, multipurpose cleaner & degreaser, contains corrosion inhibitors, does not contain butyl solvents.

2: Tile Pro Acid

Low pH tile & grout cleaner, highly concentrated restorative grout cleaner, low vapor, proprietary organic acid, safer alternative over caustic acids, incredibly effective, fast acting.

Directions:

- 1 Dilute Tile Pro Alkali with water according to the directions for use and apply to the surface.
- 2 Allow time for Tile Pro Alkali to penetrate the soil (5-10 minutes).
- 3 For a restorative applications, agitate using a slow speed machine.
- 4 Remove the mixture with a shop vac or extractor and rinse contacted surfaces with Tile Pro Acid mixed at 1 oz. per gallon of water to neutralize.
- 5 For severely soiled floors, repeat steps 1-4 using Tile Pro Acid according to the use directions.

Safe to Use On:

- Tile & Grout

**DO NOT USE ON MARBLE, LIMESTONE,
& OTHER ACID-SENSITIVE MATERIALS**

Purpose:

- Deep cleaning & restoration for tile & grout

Additional Info:

- Biodegradable

Available Sizes:

- 12 x 32 oz (Case)
- 1 Gallon (Single)
- 4 x 1 Gallon (Case)
- 5 Gallon Pail (Single)
